

Sonpal Singh Jadon

Primary Skills:-Java/J2EE

Phone:--91-9916658609

Email Id:- sonujadon856@gmail.com

Career Objective:-

Looking forward for a challenging work environment to accomplish the given assignments in time and to realize the expectation of the organization I work for to the best of my capabilities with the aim of leveraging my skill and experience towards professional growth.

Professional Summary:-

- Having around **4+ Years** Experience in the full stack development of Web-based and Enterprise Applications using the Technologies like **Core Java, Servlets, JSP, Hibernate, Spring, Restful Service, Web Services**.
- Experience in developing Applications using **OOPs, Exception Handling, Multithreading, And Collection Framework** by using **Sonar** tool to improve the **Code Quality**.
- Experience in developing Applications using **Hibernate and JPA**.
- Experience in developing Applications using **Spring and Spring Boot**.
- Experience in developing Applications using **Micro Services Architecture**.
- Experience in developing Applications using **Core and J2EE Design Patterns**.
- Experience in developing Applications using **Web Services**.
- Experience in developing Applications using **Restful Services** for integration.
- Good Knowledge of **Micro Services** to develop the application.
- Experience in **Angular6, HTML5, CSS3, JavaScript, AJAX, JSON, XML (XSD, JAXB)**.
- Experience in **Data Base** and **PL/SQL** Programming skill in **Oracle 11g** and **MySQL**.
- Experience in **NoSQL** database like **Couchbase**.
- Experience in developing Applications using tools like-**Unit Testing (JUNIT), Maven, Bit Bucket, Log4j, Jira, Jenkins** and **Swagger**.
- Experience in developing Applications using **BDD Framework (Cucumber)** and **Rest Assured API Testing**.
- Having knowledge of **Executor Framework, Concurrency API** and **JAVA 8 Features**.
- Having good knowledge of **RabbitMQ & Kafka Messaging** and **Cloud Computing**.
- Exceptional ability to learn new Technologies and to deliver output in short deadlines.
- Well at human relations, good decision maker and ability to work in and with a team well motivated enthusiastic to learn effective and outstanding communication skills.

Professional Experience:-

Working as a Senior Consultant in **Ciber Global(PWC)** from FEB-2020 to till date.

Working as a Senior Software Engineer in **GlobalLogic India** from DEC-2018 to JAN-2020.

Working as a Software Engineer in **CGI India** from May-2017 to NOV-2018.

Skill Set:-

Operating System	: Windows 10
Languages	: JAVA, SQL
J2EE Technologies	: JDBC, Servlets, JSP
Application Framework	: Spring (Spring Core, Spring JDBC, Spring AOP, Spring Transaction, Spring MVC,

	Spring Boot, Spring Security, Spring Data JPA, Spring Rest).
ORM Framework	: Hibernate, JPA
Web Services	: Soap WebServices, Restful Services
Database	: Oracle, MySQL
Servers	: Apache Tomcat, Wildly, WebLogic
IDE	: Eclipse, STS, IntelliJ
Tools	: Maven, Git, Bitbucket, Sonar Lint, Log4j, Junit , Jira , Jenkins, Swagger
Design Patterns	: Singleton, Factory, Abstract Factory Method, Factory Method, Builder, Flyweight, Template Method, Intercepting Filter, Pagination, Decorator, Adapter, Method Chaining.

Educational Qualification:-

- B.E. in Computer Science and Engineering from **SATI,Vidisha(M.P.)** in 2016with 73.9%

Projects Undertaken:-

1. Project Name : Liberty GRM

Client	: Liberty GRM
Environment	: Java, Spring Boot, Restful Services
Database	: SQL Server
Operating System	: Windows 10
IDE	: IntelliJ
Role	: Developer
Duration	: August-2020 – Till Date

Description:-

The application is being developed for Liberty GRM, which is mainly concerned for the Insurance for Customers. This is an Insurance application, where Customer can choose Insurance Policy. In this Insurance application Customer can choose multiple packages which covers multiple coverages based on package eligibility. In this app having multiple packages, but basically 3 more chosen by customer. These packages are: TPL(Third Party Liability), TPLFT(Third Party Fire & Theft), Comprehensive. These packages cover multiple coverages like- General coverage, Theft coverage, Fire coverage, Driving Other Cars coverage, Road Assistance, MandatoryLiability coverage etc. One Customer can choose multiple Insurance Policy. GRM provides support of digital flow as well. GRM provides support for different European market to buy the insurance policy. This app is expanding business in different markets as well.

Responsibilities:-

- Involved in Developing MicroServices for the **Aggregator & Partner Service API**.
- Involved in Developing for the **Partner Spring Boot Application (Ireland)**.
- Involved in Customization of EIS framework for Liberty GRM.
- Interact with Management to understand the requirements and clarifying the doubts.
- Coordinated with co-team members to develop high level business and technical Documents.
- Involved in generating Mapping classes by using MapStruct library & Lombok framework.
- Involved in working SQL database like-**SQL Server**.
- Involved in working **XML, XSD & DTO** classes.

2. Project Name : UNUM

Client : Unum
Environment : Java, Spring Boot, Restful Services
Database : SQL Server
Operating System : Windows 10
IDE : IntelliJ
Role : Developer
Duration : Feb-2020 – July-2020

Description:-

The application is being developed for Unum, which is mainly concerned for the Insurance for Customers. This is an Insurance application, where Customer can choose Insurance Policy. In this Insurance application Customer can choose Accident, Dental, and STD (Short Term Disability) Policy. One Customer can choose multiple Insurance Policy. Customer provides the information about Participants and Beneficiaries.

Responsibilities:-

- Involved in Developing for the **BenAdmin API**.
- Involved in Developing for the **CCG Application (Docgen)**.
- Interact with Management to understand the requirements and clarifying the doubts.
- Coordinated with co-team members to develop high level business and technical Documents.
- Involved in generating POJO classes from XSD schema.
- Involved in working SQL database like-**SQL Server**.
- Involved in working **XML, XSD & DTO** classes.

3. Project Name : Pearson Revel GA

Client : Pearson
Environment : Java, Cucumber, Restful Services & Rest Assured API
Database : Couchbase db
Operating System : Windows 10
IDE : Eclipse
Role : Developer
Duration : April - 2019 – Dec-2019

Description:-

The application is being developed for Pearson, which is mainly concerned for the Learning Material for students. This is a Learning application and a platform for students. Students can take subscriptions for this and complete the course and take the assessment to test the knowledge and get the point based on the accuracy. Students can also take multiple subscriptions based on the strength and they have to complete the assessment a particular duration and Students can update the duration date also. A course having multiple assignment unit and an Assignment having multiple assignment units. First, Student and Instructor should register in this platform. Instructor can upload the course and Student can learn the course and take the assessment.

Responsibilities:-

- Involved in Developing for the Micro Services Architecture like-LEC, LEE.
- Interact with Management to understand the requirements and clarifying the doubts.
- Coordinated with co team members to develop high level business and technical Documents.
- Involved in writing Entity and POJO classes.
- Involved in writing resource, service and controller classes.
- Involved in working NoSQL database like-**Couchbase**
- Involved in working **XML, XSD & DTO** classes.
- Involved in writing feature files.
- Involved in writing test cases with the help of Cucumber framework and Rest Assured API testing.

4. Project Name : Lee Home Services

Client	: Lee Company
Environment	: Java, JSP, Spring, Hibernate, and Restful Services
Application Server	: WebLogic
Database	: Oracle
Operating System	: Windows 8.1
IDE	: Eclipse
Role	: Developer
Duration	: October - 2017 –Nov-2018

Description:-

The application is being developed for Lee Company, which is mainly concerned for the Lee customers who needs assistance with any concerns with “Heating & Air Conditioning”, “Residential Plumbing Products & Services”, “Residential Electrician Products & Services”, “Residential Appliance Repair Products & Services” and “Home Renovation Services & Residential Maintenance Services”. Customer can schedule an appointment as per their appropriate time after choosing a home services which they want to help from Lee. Customer Service representative will review the request/appointment from customer and assign an appropriate team or individual technician for customer request as per the appointment timing. Lee provides a Customer Portal for their customer where there customer can login where they can also raise a complaint for any services provided earlier by lee team.

Responsibilities:-

- Involved in Developing for the module like Customer.
- Interact with Management to understand the requirements and clarifying the doubts.
- Coordinated with co team members to develop high level business and technical Documents.
- Implemented Entity and Persistence DAOs Classes & Implemented Hibernate mapping documents.
- Involved in writing Service classes.
- Involved in writing Controller's by using Spring MVC.
- Implemented tiles integration with Spring MVC.
- Implemented Spring Boot methodology to develop the module of the Application.
- Involved in writing validator classes by using Spring validator API.
- Implemented authentication based Security by using Spring Security.
- Implemented mailing with Velocity Template in Spring.
- Responsible for integrating spring with Restful Services.
- Involved in writing Unit Test cases.
- Implemented Agile methodology to develop the module of the Application.
- Participated daily in Scrum meets to discuss different issues in the project.

Personal Details:-

Date of Birth: 26-sep-1994

Current Location: Bangalore
